

Scupper Swift BOAT CART ASSEMBLY

USING YOUR SCUPPER SWIFT

Adjust the spacing of the uprights to match the width of the scupper holes on your boat. Do this by releasing the black lever on axle, adjusting width and tightening lever to secure.

Lift boat and insert uprights into scupper holes. Gently lower the boat onto cart.

Once to the water, you can take off the wheels and fold the frame for storage in the boat.

CARE:

If the cart is used in or around salt water, rinse it off and dry it to prevent corrosion.

Do not over tighten the strap when connecting the boat to the cart; this can damage your boat.

ASSEMBLY

STEP 1: To install uprights, press the push button and insert into the vertical post. Align the push button with button hole until it pops into place.

STEP 2: Slip on each wheel and insert the cotter pin into the hole at the end of the axle. Flip O-ring over the end of the axle to lock tire in place.
