

HYDROSTAR™ SEA ★ STAR DELUXE

INSTRUCTIONS

HydroStar™ Light Functions

There are five different light settings on your HydroStar™. Choose your desired setting by pushing the power button.

- 1 CLICK: 3 LED Light (10LM)
- 2 CLICKS: 3 LED Strobe (15LM)
- 3 CLICKS: 360° Deck Light (Red 6LM/Green 2LM)
- 4 CLICKS: Emergency 1 Watt LED Strobe (65LM)
- 5 SECOND HOLD: SOS Signal (65LM)

To Change Batteries

Requires: Three AAA batteries (included)

1. Twist off light housing
2. Remove battery compartment from base
3. Replace batteries
4. Reinsert battery compartment, making sure to align groove on battery compartment (see arrow sticker on battery compartment) to the groove inside the base (see arrow sticker inside base). **Match arrow sticker on battery compartment with arrow sticker inside base.**
5. Insert light housing back into base, making sure to keep circle on housing at front. Twist clockwise until tight and lights are realigned at center. **Make sure circle on light housing is at front - it needs to line up with on/off button.**

Circle should be in front when light housing is twisted into place

STEP 4: Line up arrow on battery housing with arrow inside base.

360° Deck Light

To Remove Red and Green Lens Covers:

Red and green lens covers can be removed by unclipping them from the light housing at the notches. Lens covers can be clipped back into place when finished using 360° feature.

Proper Red/Green Marker Alignment:

Align the red marker with the port side (left side while looking at bow from cockpit) of vessel.

Be sure not to press down too hard on the light housing or twist too far (past center), as this may damage the rubber O-ring seal and reduce the waterproofness of the light.
